As a first year, it can be a daunting task to get involved; but once you do, it is an incredible experience. I have gained friends for a lifetime, learned an incredible amount about myself, and found areas of passion that I never would have imagined.

What do you hope to learn about involvement on campus?
What issues, interests or topics are you passionate about?
What skills and/or abilities do you hope to gain from your campus involvement?
How will joining a student organization help you achieve your involvement goals?

Before getting involved, it is important to reflect on what you are looking for in your co-curricular experience. Please consider the questions and prompts below.
