

Michael Johnson Prize Application

The Michael Johnson Prize is an award of up to \$500 to promising students to help support a research project, course work at a field station, or graduate study in field biology. This award was made possible by a generous donation by the family and friends of Dr. Michael Johnson, former DePauw biology professor.

Name:	E-mail:
Major(s):	Graduation year:

Application materials:

1. Provide a brief summary of coursework and/or experience involving field biology while you have been a student at DePauw. Include the title of the course(s) or project(s) and a short description.
2. Provide a brief description (one or two paragraphs) of the research project, coursework at a field station, or graduate study that you would use the Michael Johnson Prize to help support. If it is a course at a field station, please provide a course description.
3. Provide contact information for two references (instructors, advisors, supervisors, principle investigators, etc.) who may be consulted regarding your application. People who are familiar with your field of biology experiences/aspirations would be appropriate references.
4. Provide an itemized budget of the projected expenses you will incur to accomplish this project including both personal and project related expenses.
5. Attach your DePauw advising transcript.

Please return application materials (email or hard copy) to Becky Kinney, Secretary, Biology Department, rebeccakinney@depauw.edu, by 4PM on April 17th. A faculty committee will review the applications and inform students who have been awarded the Michael Johnson Prize by April 30th.

Thanks for your application!
