FERID MURAD MEDAL

The Ferid Murad Medal recognizes the senior who has had the most significant scholarly and/or artistic achievements during his or her time at DePauw. The award is named after DePauw graduate and Nobel laureate Dr. Ferid Murad, class of 1958. In 1998, Dr. Murad received the Nobel Prize in Medicine for his discovery of the role of nitric oxide in the cardiovascular system, which led to changes in treatment following a heart attack.

Ferid Murad Medal Recipient Sang Truong

Sang Truong is a senior international student from Ho Chi Minh City, Vietnam. He pursues a triple major in computer science, economics, and computational chemistry. He is a Management Fellow, a Science Research Fellow, an Information Technology Associate, and a member of Phi Beta Kappa. He is the recipient of the Randal L. Wilson Junior Award (2020), Bruce Allen Long Endowed Scholarship (2019), and American Chemical Society's Inorganic Chemistry Award (2018). He is also a Princeton University's P3 Scholar and a member of Google Research's CSRMP 2021. The driving force behind his interest in machine learning research is its interdisciplinary scientific application. He has focused on leveraging domain-specific knowledge to enhance the performance of machine learning algorithms for studying interconnected systems in chemistry and economics. His previous research in strategic game modeling and molecular modeling has resulted in five refereed publications. His most recent research was a collaboration with Professor Todd Neller (Gettysburg College, PA) on modeling the decision-making process in the game of Gin Rummy during summer 2020, which resulted in a first-authored paper published at the 35th AAAI Conference on Artificial Intelligence. Sang has presented his scholarly work in several conferences during his undergraduate study, such as a paper titled "Visualizing Income Distribution in the United States" at Harvard University's National Collegiate Research Conference. Since his sophomore year, Sang has conducted independent research with Professor Jeffrey Gropp (DePauw University, IN) to design learning algorithms for time-series forecasting. Outside of DePauw, Sang has spent a semester at the University of Oxford (UK) to understand the application of computational learning theory and advanced machine learning in complex interconnected systems in economics and molecular sciences. He has not only actively been involved in academic research but he has also applied his research during his two internships. At Community Health Network, an Indiana-based integrated health care system, Sang employed time-series forecasting to estimate the financial impact of COVID-19 to support the executive team in making informed decisions. At Cummins, a multinational engine corporation headquartered in Indiana, his time-series models played an instrumental role in minimizing the economic risk from investing in emerging markets. After graduating from DePauw, Sang will pursue a Ph.D. program in Computer Science. He has been admitted to the Computer Science Ph.D. program at Stanford University, Cornell University, Washington University at St. Louis, and Purdue University.

WALKER CUP

The Walker Cup is awarded each year to the graduating senior who has done the most for DePauw University during his or her college career. The prize was established in 1926 by a gift from Guy Morrison Walker, Class of 1890, a successful businessman and presidential advisor. Traditionally, the Walker Cup recipient speaks at commencement.

Walker Cup Recipient Emma Bailey

Emma Bailey is a Kansas resident who has a passion for equity in education. She double majored in economics and Hispanic studies and plans to pursue a master's degree in learning design, innovation and technology at Harvard University's Graduate School of Education. She is a management fellow and an honor scholar; for her honor scholar thesis, she researched the finances of first-generation college students, explored the barriers they face to entry and success and proposed a model that members of the Great Lakes College Association could use to better support such students. Bailey has acted on her passion for equity in education in several ways: She has been a community service coordinator; a student leader in Servicio en las Americas; an intern at the Women's Center; an intern in the Office of Admission; and an intern in the DePauw President's Office, where she has assisted in the ongoing strategic planning process. She also was a peer mentor for the First-Year Experience.
